EDUCATION

University of Dhaka

Master in Information Technology

CGPA- 3.71

Jan. 2020 - Nov. 2021

Shahjalal University of Science and Technology

BSc in Electrical and Electronic Engineering 2019

CGPA- 3.28

Apr. 2015 - Aug. 2019

SKILLS

WEB STACK: Node.js, Javascript, Mysql, MongoDB

OS & TOOLS: Linux, Git

PROGRAMMING LANGUAGE: C, Python, Java, PHP

HARDWARE: Robotics, Arduino

FRONTEND: HTML, CSS, PHP

PROBLEM SOLVING

- LightOj (Profile: lightoj.com/user/raihaanshoyon)
- LeetCode (Profile: leetcode.com/rorschach8025)
- HackerRank (Profile: www.hackerrank.com/raihaanshoyon95)
- Codeforces (Profile: codeforces.com/profile/rorschach8025)

RESEARCH EXPERIENCE

- Skin Segmentation for Hand Gesture Recognition Using Image Processing

PERSONAL INTERESTS

System programming, Machine learning, Software Engineering

PROJECTS

Chess Engine

A chess engine developed in Java. The chess engine is associated with an interactive GUI built in Java Swing so user can play chess against the engine.

Project Link: <https://github.com/r8025n/chess-engine>

Nand to Tetris (Projects from online course Nand to Tetris):

- A basic level of CPU starting from the elementary logic gates, counter, ram, ALU etc using course specific HDL.
- A two tier compiler for a programming language named JACK, which can compile JACK language to assembly language.

Project Link: <https://github.com/r8025n/nand2tetris>

Arduino Projects

Dual Examiner Mark Submission

A website for a mark submission system where both of the examiners will be able to submit mark and authenticated students will be able to see their marks. Built using PHP, HTML, JavaScript, MySQL.
